

UNITED STATES PATENT OFFICE.

JULES H. NORMAND AND LEON DUFILHO, OF NATCHITOCHEs, LOUISIANA.

IMPROVEMENT IN MEDICATED OILS.

Specification forming part of Letters Patent No. **201,194**, dated March 12, 1878; application filed September 6, 1877.

To all whom it may concern:

Be it known that we, JULES H. NORMAND and LEON DUFILHO, residents of the town of Natchitoches, parish of Natchitoches and State of Louisiana, have invented a certain new and useful Improvement in Medicinal Oil; and we do hereby declare the following to be a full, clear, and correct description of the same.

This invention relates to that class of compounds used in the cure of cuts, burns, bruises, wounds, &c.; and it consists in a composition formed by mixing pure olive-oil with trifolium, arnica-flowers, and angelica-root.

The preparation of our oil consists in the maceration of about three ounces of trifolium, five ounces of arnica-flowers, and three ounces of angelica-root in about three gallons of the very purest of quality of olive-oil. This infusion is allowed to stand for an indefinite period of time, the longer the better, as thereby the several ingredients will more thoroughly unite.

Our preparation is applied by saturating a piece of linen therewith, and by bandaging the same over the cut, or sore, or whatever else it may be.

Having described our invention, what we claim as new, and desire to secure by Letters Patent, is—

An oil or compound consisting of olive-oil, trifolium, arnica-flowers, and angelica-root, in about the proportions named, and for the purpose specified.

In testimony whereof we have hereunto signed our names.

JULES H. NORMAND.
LEON DUFILHO.

In presence of—
C. L. KOCK,
J. C. HUBBELL.
