# UNITED STATES PATENT OFFICE.

JOSEPH W. FISKE, OF NEW YORK, N. Y.

## DESIGN FOR AQUARIUMS.

Specification forming part of Design No. **8,058**, dated February 16, 1875; application filed January 18, 1875.  
[Term of Patent 7 years.]

### CASE A.

*To all whom it may concern:*

Be it known that I, JOSEPH W. FISKE, of New York, in the county of New York and State of New York, have invented certain Improvements in Design for an Aquarium, of which the following is a specification:

The design is fully shown in the accompanying photographic illustration, to which reference is made. It consists of an octagonal frame, composed of uprights united by a rail at their top, and secured at their lower ends to an ornamental basin or bowl, which is supported on the ornamental column, as shown in the illustration, there being also a small column

rising from the center of the basin, and which supports at its upper end a small ornamental basin, and which may or may not be provided with a central jet. The uprights of the frame are also made ornamental upon their exterior, as shown in the photograph.

What I claim is—  
The design for an aquarium, substantially as herein shown and described.

JOSEPH W. FISKE.
