# UNITED STATES PATENT OFFICE.

JOHN HOARE, OF CORNING, NEW YORK.

## DESIGN FOR BOUQUET-HOLDER OR VASE.

Specification forming part of Design No. **S.187**, dated March 2, 1875; application filed January 25, 1875.  
[Term of Patent  $3\frac{1}{2}$  years.]

*To all whom it may concern:*

Be it known that I, JOHN HOARE, of the town of Corning, in the county of Steuben and State of New York, have invented a Design for a Bouquet-Holder or Vase made of glass, of which the following is a specification:

The nature of my design is fully represented by reference to the accompanying photographic view, which represents a bouquet-holder or vase made of glass, and which is an exact counterpart of the original design.

This bouquet-holder or vase is to be manufactured and made of glass blown in a wood or iron mold made specially for this purpose, and in the ordinary way that other articles of glass are made or blown when molds are used.

A represents the scallop, which is formed by cutting away the glass between each alternate scallop; B, the fine lines, and C the peg.

The peg is made similar to the pegs in general use on other flower-vases or bouquet-holders; and I make no claim for anything new as regards the above-named peg, which is an appendage to secure it in its mounting of silver or other metal.

The vase is afterward obscured and flattened or squared on the top, and ornamented with ten square scallops on the outer edge or rim, from which scallops ten fine bright cuts or lines are cut converging toward the peg, which is made to fit a mounting either of wood or metal.

The edge of the scallop is also ornamented with fine cuts, the whole representing a seashell.

I am aware that there are other vases of various designs, but claim that none have yet been manufactured of the shape shown and herein described.

I claim—

As a design, a bouquet-holder or vase made of glass, in the form and shape as shown and described, and obscured and ornamented by cutting, as herein specified.

JOHN HOARE.
