# UNITED STATES PATENT OFFICE.

FRANK H. SHEPHERD AND EMIL SCHWAB, OF LOWELL, ASSIGNORS TO  
JAMES W. TUFTS, OF MEDFORD, MASSACHUSETTS.

## DESIGN FOR THE CASING OF A SODA-WATER APPARATUS.

Specification forming part of Design No. **8,191**, dated March 2, 1875; application filed February 10, 1875.  
[Term of Patent 14 years.]

*To all whom it may concern:*

Be it known that we, FRANK H. SHEPHERD and EMIL SCHWAB, of Lowell, in the county of Middlesex and State of Massachusetts, have invented and produced a new and original Design for the Casing of a Soda-Water Apparatus, of which the following is a full, clear, and exact description, reference being had to the accompanying photograph making part of this specification.

In the photograph, A represents the lower or main portion of the casing of a soda-water apparatus, which is of rectangular form. B is the roof, which is inclined on each side from *a* to *b*, and from the center of this roof, on each side, projects a gable, C, of the form shown. Above the line *b* is a rectangular portion, D, which is surmounted by a top, E, which slopes on each side from *e* to the ridge

*d*, and at each end from *f* to *g*, the upper portion of the top E being of less length than the lower portion, and having triangular-shaped ends *h*, a beautiful and unique design being thus produced.

What we claim as our invention, and desire to secure by Letters Patent, is—

1. The design for the casing of a soda-water apparatus, substantially as herein shown and described.
2. The design of the top E, substantially as shown and described.

Witness our hands this 5th day of February,  
A. D. 1875.

FRANK H. SHEPHERD.  
EMIL SCHWAB.

In presence of—

C. C. HUTCHINSON,  
L. W. WENTWORTH.
