UNITED STATES PATENT OFFICE.

CHAUNCEY M. MURCH, OF CINCINNATI, OHIO.

DESIGN FOR REFLECTOR.

Specification forming part of Design No. **8,262**, dated April 13, 1875; application filed March 20, 1875.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, CHAUNCEY M. MURCH, of Cincinnati, in the county of Hamilton and State of Ohio, have invented a new and original Design for Bird-Wing Reflector, of which the following is a specification:

My device is fully represented in the accompanying drawings, to which reference is made, and in which—

Figure 1 is a front view of the reflector, and Fig. 2 is a top view of the same.

Similar letters of reference indicate corresponding parts.

A represents the head of an eagle or other bird, which is divided or notched, as shown in Fig. 1. B represents the wings of the bird, which are spread so as to project at an angle

with each other, as shown in Fig. 2. C represents the tail of the bird, which projects beneath the wings, as shown in Fig. 1. The surface of the parts may be indented or roughened to represent feathers, or may be entirely plain without departing from my design. The outline of the head, wings, and tail may also be varied without departing from my design.

I claim as my invention—

A design for a V-reflector representing bird-wings spread at an angle with each other, substantially as herein shown and described.

CHAUNCEY M. MURCH.
