

# UNITED STATES PATENT OFFICE

LEONARD S. BEALS, OF ASTORIA, NEW YORK.

## DESIGN FOR BREASTPIN.

Specification forming part of Design No. 8,274, dated April 20, 1875; application filed April 9, 1875.  
[Term of Patent 7 years.]

### CASE A.

*To all whom it may concern :*

Be it known that I, LEONARD S. BEALS, of Astoria, in the county of Queens and State of New York, have invented a Design for Breastpin, of which the following is a specification:

This invention is illustrated in the accompanying drawing, in which—

Figure 1 represents a face view. Fig. 2 is a sectional view.

Similar letters indicate corresponding parts.

This design consists of an inclined escutcheon bearing heart-shaped shells and an arched lozenge, which contains an oval drop.

In the drawing, the letter A designates my breastpin, of which *a* is an escutcheon, the sides of which are slightly inclined from the center downward, and the ends of which have angular enlargements *b*. In the lower side of the escutcheon *a* is formed an arch, *c*, which is surrounded by a lozenge, *d*, the face

of the latter being ornamented with leaves *e* projecting from a spiral stem. From the arch *c* depends a drop, *f*, of oval form. On the face of the escutcheon *a*, and on the opposite sides of the lozenge *d*, are heart-shaped shells *g*, which are ornamented with interior radiations, as shown.

What I claim as new, and desire to secure by Letters Patent, is—

The design composed of the inclined escutcheon *a*, arched lozenge *c d*, oval drop *f*, and heart-shaped shells *g*, substantially as shown and described.

In testimony that I claim the foregoing, I have hereunto set my hand and seal this 24th day of March, 1875.

LEONARD S. BEALS. [L. S.]
