# UNITED STATES PATENT OFFICE.

JOHN ERNEST MILLER, OF PITTSBURG, PENNSYLVANIA.

## DESIGN FOR GOBLET.

Specification forming part of Design No. **8,291**, dated April 27, 1875; application filed April 10, 1875.  
[Term of Patent 3½ years.]

*To all whom it may concern:*

Be it known that I, JOHN ERNEST MILLER, of Pittsburg, Allegheny county, Pennsylvania, have invented a Design for Goblets, of which the following is a specification:

The nature of my design is fully represented in the accompanying photographic illustration, to which reference is made.

A represents the plain portion of the body of the goblet; and B its ornamental bottom. The stem *e* of the pedestal, which supports the body, is hexagonal in form, enlarged at C and also at D, where it joins the base or foot *f*. The flat surfaces of the stem *e* terminate at B and D, forming leaf-like ornamentations and V-formed surfaces in outline at C.

What I claim as my invention is—

A design for a goblet, in which a hexagonal-shaped stem is enlarged at its points of juncture with a like shaped pedestal for supporting the body, and with the base or foot, the flattened sides of said stem terminating above in V-shaped surfaces in outline, and below in leaf-like outlines, substantially as shown and described.

J. ERNEST MILLER.
