# UNITED STATES PATENT OFFICE.

CHARLES KITSCHIELT, OF NEW YORK, N. Y., ASSIGNOR TO NICHOLAS  
MULLER'S SONS, OF SAME PLACE.

## DESIGN FOR INKSTAND-SUPPORTS.

Specification forming part of Design No. **8,363**, dated June 1, 1875; application filed May 14, 1875.  
[Term of Patent 7 years.]

### CASE E.

*To all whom it may concern:*

Be it known that I, CHARLES KITSCHIELT, of the city, county, and State of New York, have invented a Design for Supports for Inkstands, of which the following is a specification:

The nature of my design is fully represented in the accompanying drawings, to which reference is made, and in which—

Figure 1 is a front elevation, and Fig. 2 a plan view, representing my design aforesaid.

The upper part of the base A is raised around the rabbet *a*, in which the inkstand is placed, and finished at its lateral portions by a rounded bead, *b*. The sides of the base are narrowed, as shown, from *a'* to *b'*, to the front *c* thereof. The front *c* projects forward and downward with an inward curve, as shown at *r*, and terminates in a nearly upright panel, B, the form and chasing upon which are repre-

sented in Fig. 1. At each rear corner of the base is a pillar, *f*, surmounted by an inclined tablet, *g*, and springing from the pillars, near the top thereof, is a sloping tablet, C, which is formed with lateral projections *m*, resembling blunt arrows in shape.

I propose to make this design in bronze or other suitable metal or hard material

What I claim as my invention is—

The design for an inkstand-support, comprising the base A, having the rounded bead *b*, the sloping front *c*, upright panel B, pillars *f*, and sloping tablet C, the whole having the contour and configuration substantially as herein set forth.

CHARLES KITSCHIELT.
