UNITED STATES PATENT OFFICE.

GEORGE G. MILLER, OF PHILADELPHIA, PENNSYLVANIA.

DESIGN FOR A COMB.

Specification forming part of Design No. **8,413**, dated June 22, 1875; application filed June 9, 1875.
[Term of Patent 3½ years.]

To all whom it may concern:

Be it known that I, GEORGE G. MILLER, of the city and county of Philadelphia and State of Pennsylvania, have originated and designed a new and useful Ornamental Design for Head of a Comb, of which the following is a full, clear, and exact description, reference being had to accompanying drawing, making part of this specification.

The nature of my design is fully represented in the accompanying drawing, to which reference is made.

The upper line of the head A is scalloped as at *a*, and curves *b* are described from the points of intersection of the scallops, so that there is presented the appearance of a series of contiguous circles. Arc-shaped openings *c* are formed in the circles, so that in the cen-

ters of the latter there are left elliptical-shaped pieces *d*; or, in other words, the circles may be said to be rings, which are united centrally by elliptical-shaped studs or pieces *d*. At a point above the teeth there may be formed openings *e e*, which relieve the appearance of the center of the head.

The design will be found to be neat, graceful, and attractive.

What I claim as my invention is—

A design for a head of a comb, composed of a series of circles, *a b*, having arc-shaped openings *c* and elliptical-shaped pieces *d*, substantially as above set forth and shown.

GEORGE G. MILLER.
