# UNITED STATES PATENT OFFICE.

HERMAN MILLER, OF NEW YORK, N. Y., ASSIGNOR TO THE DEVOE MANUFACTURING COMPANY, OF SAME PLACE.

## DESIGN FOR HANDLES FOR CANS, &c.

Specification forming part of Design No. **8,570**, dated August 17, 1875; application filed August 2, 1875.  
[Term of Patent 7 years.]

*To all whom it may concern:*

Be it known that I, HERMAN MILLER, of New York, in the county and State of New York, have invented an Improved Design for Handles for Cans and other articles; and I do hereby declare that the following is a full, clear, and exact description of the same, reference being had to the accompanying drawing, in which—

Figure 1 is a top view of a handle embracing my improved design. Fig. 2 is a longitudinal section taken in the line *yy* of Fig. 1, and Fig. 3 is a cross-section of the same.

The handle A, in its longitudinal section, forms an arch, as shown in Fig. 2. It is contracted in width between its ends, as shown in

Fig. 1, and has its edges *b* turned up at the sides, as shown in Figs. 2 and 3. At the spring of the arch, near each end of the handle, is a raised ornament consisting of two semi-conical figures, *c*, with a semi-ellipsoidal figure, *d*, between them, the apexes of the cones pointing toward the center of the handle.

What I claim as new, and desire to secure by Letters Patent, is—

The design for handles for cans and other articles, herein shown and described.

HERMAN MILLER.
