UNITED STATES PATENT OFFICE.

WILLIAM TWEEDDALE, OF BROOKLYN, NEW YORK.

DESIGN FOR STOVE.

Specification forming part of Design No. **8,660**, dated September 21, 1875; application filed June 26, 1875.
[Term of Patent 14 years.]

To all whom it may concern:

Be it known that I, WILLIAM TWEEDDALE, of Brooklyn, in the county of Kings and State of New York, have invented a new and original Design for Stove, of which the following is a specification:

The nature of my design is fully represented in the accompanying photographic illustration, to which reference is made.

The top plate is ornamented with the open scroll-work A. The front plate has the scroll figures B in each upper corner, also the right-angled plain bars C and curved plain bars D, and in the center, over the arch, is an upright A-shaped figure crossed by an inverted figure of the same form, the bars of which are fluted and ornamented at the ends. These figures form, by so crossing, a frame or border for an opening in the plate, in which is placed an ornamental tile of bright color. The lower part of the front plate is ornamented with the raised figures G, surmounting a base construction, H, in which is a tile panel, I, of ornamental character. The margins of the front plate represent pillars J, which are plain for the most part, but have middle ornaments K and capitals L. The side plates of the stove have the interlaced and scroll ornaments M O, in the center of which is an inlaid tile ornament, P. The sides of the front projection of the ash-chamber are ornamented by a circular rib, straight horizontal bars, and the ornamental embellishments represented at Q. The front curved corners have the ornaments R in a diamond-shaped panel. The front plate of the ash-chamber is formed with the ornamental tracery S and the tile ornaments T—the legs with plain and ornamental straight and circular ribs or bars, and curved and curled figures U. The plate in front of the grate has plain zigzag cross-bars V, with parallel middle portions and ornamental ends, the middle portions being inlaid with the ornamental tile W, and the top grate-bar is ornamented with the points X.

I claim as a design for stoves—

1. The design consisting of scroll figures B in the upper corners of the front-plate, as set forth.
2. The design consisting of right-angled plain bars C, the curved bars D, and the scroll figures B in the upper corners of the front plate, as set forth.
3. The design consisting of upright and crossed A-shaped figures, with fluted and ornamented bars in the center of the front-plate top, as set forth.
4. The design consisting of raised figures G, surmounting the base formation H of the bottom of the front plate, as set forth.
5. The design consisting of plain marginal pillars J of the front plate, with middle ornaments K and capitals L, as set forth.
6. The design consisting of interlaced and scroll ornaments on the side plates of the stove, as set forth.
7. The design consisting of circular rib, straight horizontal bars, and the ornamental embellishments Q in the sides of the ash-chambers, as set forth.
8. The design consisting of ornaments R in the curved corner panels, as set forth.
9. The design consisting of ornamental tracery S and the tile ornaments in the front of the ash-box, as set forth.
10. The design consisting of plain and ornamental straight and circular ribs or bars and curved and curled figures U on the legs, as set forth.
11. The design consisting of plain zigzag cross-bars V, with parallel middle portions and ornamental ends, and the tile ornament on the plate in front of the grate, as set forth.

WILLIAM TWEEDDALE.
