INVENTOR -

UNITED STATES PATENT OFFICE.

CHARLES ROWLAND, OF NEW YORK, N. Y.

DESIGN FOR FANS.

Specification forming part of Design No. **8,668**, dated September 28, 1875; application filed August 26, 1875.
[Term of Patent 3½ years.]

CASE B.

To all whom it may concern:

Be it known that I, CHARLES ROWLAND, of the city, county, and State of New York, have originated and Designed an Improved Fan, of which the following is a specification:

The photographic illustration or drawing accompanying this specification shows the invention.

My fan, thus presented, is designed in the shape of a perpendicular cut or section of the old Independence Bell, at Philadelphia, with like inscriptions as are found on said bell. The handle to said fan will be in one piece with the bell, or, of wood or any desired material, be made separate from the fan. The article will be made of any desired rigidified material.

Having thus stated the nature of my invention, what I claim is—

1. The design for a fan of the configuration of a bell, substantially as described, and shown in the accompanying illustration.

2. The design for a fan of the configuration of a bell, as shown, and having the inscription—"Proclaim liberty throughout the land unto all the inhabitants thereof"—found upon the old Independence Bell of Philadelphia, Pennsylvania, substantially as described.

In testimony that I claim the foregoing improvement in fans, I have hereunto set my hand and seal this 31st day of July, 1875.

CHARLES ROWLAND. [L. s.]
