UNITED STATES PATENT OFFICE.

WILLIAM A. WALTON, OF PROVIDENCE, RHODE ISLAND, ASSIGNOR TO THE
WEYBOSSET MILLS, OF SAME PLACE.

DESIGN FOR FANCY CASSIMERES.

Specification forming part of Design No. **8,692**, dated October 5, 1875; application filed September 18, 1875.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, WILLIAM A. WALTON, of the city and county of Providence, in the State of Rhode Island, have invented a new Design for Fancy Cassimeres; and I do hereby declare that the following specification, taken in connection with the drawings making a part of the same, is a full, clear, and exact description thereof.

The distinctive peculiarity which characterizes the design for fancy-woven cassimeres, hereinafter described, consists in the novel composition of the figures which ornament the broad stripes A, running lengthwise of the fabric, and also in the effect which is produced by the arrangement in a pattern of such peculiarly-composed stripes A with narrow separating-stripes B.

The ornamental portion of the broad stripes A is composed of groups of five quadrangular figures *a*, one of them being placed centrally in the group, and the other four arranged around the sides of the central one. These groups of geometrical figures are separated from each other in the same stripe by rectangular patches of basket-weaving C, giving the effect of a series of broken or knotted lines

arranged parallel to each other, and running crosswise of the fabric.

The ornamental portion of the stripe A is placed upon a ground of plain weaving, and narrow stripes B, of a common pattern, are arranged lengthwise of the fabric, alternately with the broad stripes. Stripes of any other common pattern may be substituted for the stripes B, to mark the boundaries of the broad stripes A, and the effect will be the same; or the narrow stripe may be omitted altogether, and the ornamental stripes A be separated from each other by simple stripes of plain weaving.

The design may be represented in any variety or combination of colors that may be preferred for bringing out the effect of the patent.

What I claim as my invention, and desire to secure by Letters Patent, is—

The design for fancy cassimeres, substantially as described, and shown in the drawings.

WILLIAM A. WALTON.
