# UNITED STATES PATENT OFFICE.

FRANK NORTHRUP, OF DETROIT, MICHIGAN, ASSIGNOR TO HIMSELF AND  
ROBERT A. LITTLE, OF SAME PLACE.

## DESIGN FOR PROVISION-SAFE.

Specification forming part of Design No. **8,704**, dated October 5, 1875; application filed June 3, 1875.  
[Term of Patent 7 years.]

*To all whom it may concern:*

Be it known that I, FRANK NORTHRUP, of Detroit, in the county of Wayne and State of Michigan, have invented a Design for a Cheese-Safe, of which the following is a specification:

The nature of my design is fully represented in the accompanying photographic illustration, to which reference is made.

A represents a rectangular base; and A' is the top, supported by four corner-posts, B, with an intermediate stile, B', dividing each side into two vertical panels, all of which are covered with wire-cloth of fine mesh. The front side is made to open as a door, which is single, but folds upon itself, as shown, the two parts being hinged together at the center-stile.

Around the base is an ogee-molding, *a*, and a similar one, *a'*, is run around the top to serve as a cornice. A lighter molding of the same pattern is run around the edge of each panel, and a pleasing effect is produced by staining all the moldings a dark color, and varnishing the rest of the wood-work, leaving it in its natural color.

What I claim as my invention is—

As a design for a cheese-safe, the rectangular cage shown, having two vertical panels on each wall, a molded top, A', and a molded base, A.

FRANK NORTHRUP.
