# UNITED STATES PATENT OFFICE.

CHARLES M. JENCKES, OF NEW YORK, N. Y., ASSIGNOR TO BLOOMFIELD BROWER.

## DESIGN FOR INKSTANDS.

Specification forming part of Design No. 8,716, dated October 11, 1875; application filed September 27, 1875.  
[Term of Patent 3½ years.]

*To all whom it may concern:*

Be it known that I, CHARLES M. JENCKES, of New York, in the county of New York and State of New York, have invented and produced a new, useful, and original Shape, or Configuration of an Inkstand, of which the following is a full, clear, and exact description, reference being had to the accompanying photographic illustration, making part of this specification.

The nature of my design is fully represented in the accompanying photographic illustration, to which reference is made.

A represents the cover of the inkstand; B, the well thereof; C, its base. The cover and well are made of such a configuration as to represent a bell, with lugs or projections on top thereof, and with a crack extending from near its upper portions to the rim thereof. It also has bands or rings extending about its circumference, and may be provided with an inscrip-

tion in *basso-relievo*, as shown in the photographic illustration. The bottom of the well is made to form a jagged outline, and rests upon a base, C, ornamented substantially in the manner shown in the photographic illustration. The distinctive character of my design is found in the well and cover forming an unhung bell.

What I claim as my invention is—

A design for an inkstand consisting of a well and cover made in imitation of a bell, and the ornamented base, substantially as shown and described.

In testimony whereof I have signed my name to this specification in the presence of two subscribing witnesses.

CHARLES M. JENCKES.
