# UNITED STATES PATENT OFFICE.

RICHARD A. CULTER AND DAVID C. PROCTER, OF PEORIA, ILLINOIS.

## DESIGN FOR COOKING-STOVES.

Specification forming part of Design No. **3,768**, dated November 2, 1875; application filed October 1, 1875.  
[Term of Patent 7 years.]

*To all whom it may concern:*

Be it known that we, RICHARD A. CULTER and DAVID C. PROCTER, both of Peoria, in the county of Peoria and State of Illinois, have jointly originated and produced a Design for Cooking-Stoves, of which the following is a full, clear, and exact description, reference being had to the accompanying engraving, making part of this specification.

The nature of our design is fully represented in the accompanying illustration of a cooking-stove, called the "Antelope," manufactured by our firm of CULTER & PROCTER, at Peoria, Illinois. Our design particularly consists in the special ornamentation of the side of the stove.

The panels A A<sup>1</sup> A<sup>2</sup> are adorned with arabesque bordering and the usual molding, but are distinguished above other stoves by the peculiar form of shield C, bearing for a device the medallion D, with its ornamental cross *a*; and the panel A is distinguished by an orna-

mental raised bordure, *b*, surrounding the shield C, and also conforming to the bounds of the door-panel, and also by the tassels *c* depending from the upper points of the shield. The panel A<sup>1</sup> is substantially the same; but in the remaining panels the bordure *b* is omitted.

We claim—

1. In a design for cooking-stoves, the ornamentation herein described of the panel A, consisting of the peculiar shield C, bearing an ornamental medallion, and having the tassels *c*, the whole surrounded by the bordure *b*, as shown.

2. In a design for cooking-stove panels and doors, the shield C, bearing the ornamental medallion D, as shown.

RICHARD A. CULTER.  
DAVID C. PROCTER.
