UNITED STATES PATENT OFFICE.

GURDON G. WOLFE, NICHOLAS S. VEDDER, AND FRANCIS RITCHIE, OF
TROY, NEW YORK, ASSIGNORS TO HICKS & WOLFE, OF SAME PLACE.

DESIGN FOR COOKING-STOVES.

Specification forming part of Design No. 8,769, dated November 2, 1875; application filed October 20, 1875.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that we, GURDON G. WOLFE, NICHOLAS S. VEDDER, and FRANCIS RITCHIE, all of the city of Troy, in the county of Rensselaer and State of New York, have jointly invented and produced a new and original Design for Cooking-Stoves, of which the following is a specification, reference being had to the accompanying photographic representation.

One part of this invention consists of the design for the compound panel ornament A for the oven-door, the same being composed of the extended base portion *b*, with scroll-like ends, the middle portion *c* having side scrolls *d d*, the upper octagonal portion *e* and the lateral projections *f f*, all shaped, ornamented, and combined substantially as represented in the aforesaid photograph, with or without the engraved vinelet ornamentations *g h i*.

Another part of this invention consists of the design for the panel ornament J for the

smaller doors or panels, the same being composed of the central projecting octagonal shield *k*, with concave edges and faces, and the lateral projecting parts *l l*, all shaped, ornamented, and arranged together, as particularly shown in the photograph, with or without the top and bottom intaglio ornaments *m m*.

What we claim as our invention is—

1. The design for the compound panel ornament A, composed of the parts *b*, *c*, *d d*, *e*, and *f f*, shaped and combined as herein described.

2. The design for the panel ornament J, composed of the parts *k* and *l l*, all shaped and arranged as described.

In testimony whereof we hereunto set our hands this 17th day of August, 1875.

GURDON G. WOLFE.
NICHOLAS S. VEDDER.
FRANCIS RITCHIE.
