UNITED STATES PATENT OFFICE.

BURTON MALLORY, OF NEW HAVEN, CONNECTICUT, ASSIGNOR TO
MALLORY, WHEELER & CO., OF SAME PLACE.

DESIGN FOR DOOR-KNOBS.

Specification forming part of Design No. **8,772**, dated November 9, 1875; application filed October 26, 1875.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, BURTON MALLORY, of New Haven, in the county of New Haven and State of Connecticut, have invented a new Design for Door-Knob; and I do hereby declare the following, when taken in connection with the accompanying drawings and the letters of reference marked thereon, to be a full, clear, and exact description of the same, and which said drawings constitute part of this specification, and represent a perspective view.

This invention relates to a design for door-knobs, such as are usually made from metal, but applicable to any material; and it consists in the peculiar ornamentation of the knob, as shown in the accompanying illustration, and hereinafter described.

On the face or front of the knob there is a succession of alternately plain and matted spaces, radiating in a curved line from the center to the edge of the knob.

It is not essential, however, that the surfaces between the plain spaces be matted, it only being necessary that a contrast be produced to show the plain spaces in relief.

I claim—

The design for door-knob, consisting of the alternate radially-curved spaces, as described, and shown in the accompanying illustration.

BURTON MALLORY.
