UNITED STATES PATENT OFFICE

GEORGE O. MONROE, OF NEWARK, NEW JERSEY.

DESIGN FOR SACHEL-HANDLE TIP.

Specification forming part of Design No. **8,776**, dated November 9, 1875; application filed June 21, 1875.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, GEORGE O. MONROE, of Newark, in the county of Essex and State of New Jersey, have invented or produced a Design for Sachel-Handle Tips, of which the following is a description:

This tip is nearly circular, and slightly tapering, and is made with a loop at the lower end.

The present design relates to the ornamental shape and configuration of the edges of the sheet-metal tip.

In the drawing I have shown a perspective view of the tip for sachel-handles.

The edges *a a* are scalloped or serrated, and the end portions of the tip are made as com-

pond or ogee curves that are ornamental, and serve to improve the general appearance of the tip. The tip has a contraction or neck at *e* between the socket portion for the handle and the loop *f* at the end of the tip.

I claim—

The design of the ornamental shape and configuration of sachel-handle tip, substantially as described and represented.

Signed by me this 17th day of June, A. D. 1875.

G. O. MONROE.

Witnesses:

CHAS. H. SMITH,
GEORGE SERRELL.
