UNITED STATES PATENT OFFICE

JOHN J. BONNET, OF QUINCY, ILLINOIS.

DESIGN FOR STOVES.

Specification forming part of Design No. **8,793**, dated November 16, 1875; application filed November 5, 1875.
[Term of Patent $3\frac{1}{2}$ years.]

To all whom it may concern:

Be it known that I, JOHN J. BONNET, of Quincy, in the county of Adams and in the State of Illinois, have invented certain new and useful Improvements in Design for Illuminated Tops for what are known as the "Todd Stoves;" and do hereby declare that the following is a full, clear, and exact description thereof, reference being had to the accompanying drawings, and to the letters of reference marked thereon, making a part of this specification.

My design relates to that class of stoves known as "Todd stoves," and is fully illustrated by the accompanying drawing, to which reference is made.

B is the body of the stove, somewhat in barrel form, with end pieces C C, of suitable or-

namental design. The top of the stove is surmounted by an urn, D, or other ornament, as desired. In the top, on each side, are formed a series of windows, A A, divided or separated by means of pillars *a a*, and formed with roofs G G, as shown, thus making an illuminated top for a Todd stove.

What I claim is—

The design for illuminated top for a Todd stove, consisting of the windows A, pillars *a*, and roofs G, all as shown and described.

In testimony that I claim the foregoing I have hereunto set my hand and seal this 13th day of October, 1875.

JOHN J. BONNET. [L. S.]
