UNITED STATES PATENT OFFICE.

FRANCIS O. HANSON, OF PHILADELPHIA, PENNSYLVANIA.

DESIGN FOR GATES.

Specification forming part of Design No. **8,853**, dated December 21, 1875; application filed November 15, 1875.
[Term of Patent 3½ years]

To all whom it may concern:

Be it known that I, FRANCIS O. HANSON, of Philadelphia, in the county of Philadelphia and State of Pennsylvania, have invented a certain new and useful Design for Cemetery-Gates; and I do hereby declare the following to be a full, clear, and exact description of the invention, such as will enable others skilled in the art to which it pertains to make and use it, reference being had to the accompanying illustration, which forms part of this specification, and which is a photograph of my design.

My design for a cemetery-gate, or gate for cemetery lot or inclosure, is fully shown in the accompanying photograph; and consists of the center circle, the radial and diagonal bars, the square inclosing the same, and the particular configuration and ornamentation of the various parts, as illustrated.

The ornamentally-configured parts consist of the central socket, the outer sockets, and the cap or head piece, these parts being shown, respectively, at *a*, *b*, *c*, and *d*.

What I claim is—

The design for a gate, consisting of the square frame, surmounted by a head-piece, and having the interior diagonal and radial bars and center circle ornamented as shown and described.

In testimony that I claim the foregoing I have hereunto set my hand this 29th day of October, 1875.

FRANCIS O. HANSON.
