UNITED STATES PATENT OFFICE.

SHUBAEL COTTLE, OF NEW YORK, N. Y.

DESIGN FOR BEAD FOR A NECKLACE.

Specification forming part of Design No. **8,871**, dated December 28, 1875; application filed November 27, 1875.
[Term of Patent 3½ years.]

To all whom it may concern:

Be it known that I, SHUBAEL COTTLE, of the city, county, and State of New York, have invented a Design for a Bead for a Necklace, of which the following is a specification:

The nature of my design is fully represented in the accompanying photographic illustration, to which reference is made.

A represents the end parts of the bead, which are made slightly tapering or conical, and their extreme ends are beveled or rounded off. Around the middle part of the bead is formed a wide semicircular ring-groove, B. Around the bead, at the middle part of the groove B, is a ring-bead, C.

The end parts A of the bead may be plane,

or may be grooved or ribbed longitudinally; but I do not consider this an essential feature of my invention.

Having thus described my invention, I claim—

The design for a bead for a necklace, in which the end parts are made slightly tapering or conical, the extreme ends being beveled or rounded off, a semicircular groove being formed around the middle part, and a ring-bead around the middle part of the groove, substantially as herein shown and described.

SHUBAEL COTTLE.
