UNITED STATES PATENT OFFICE.

FRANK A. MAGEE, OF CHELSEA, ASSIGNOR TO THE MAGEE FURNACE COMPANY, OF BOSTON, MASSACHUSETTS.

DESIGN FOR PORTABLE GRATE.

Specification forming part of Design No. **8,920**, dated January 18, 1876; application filed January 13, 1876.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, FRANK A. MAGEE, of Chelsea, in the county of Suffolk and State of Massachusetts, have invented and produced a new and original Design for a Portable Grate, of which the following is a full, clear, and exact description, reference being had to the accompanying photograph, making part of this specification.

In the photograph, A represents the base-plate of the grate, which is supported on ornamental legs *a*. B is the body, and C a portion projecting in front thereof to receive the ash-pan. Above this portion C is the hearth *b*, provided with a fender-rail, *c*, extending between the posts *d*. On each side of the body B is a raised ornamental panel, *w*, and on each end of the portion C is a raised panel, *e*, having a center ornament, *f*, the front corners of the portion C, which are beveled as shown, being each ornamented with a pillar, *g*. The front of the grate has on each side of the fire-place an ornamental pillar, *h*, and the top of the fire-place, above the hood *i*, is made in the form shown, with a straight central portion, *5*, and two curved corner portions, *6 6*, above each of which is a panel, *k*, having an ornamental scroll. Above the center of the top of the fire-place is an ornament, *l*, resembling the key-stone of an arch, having on each side a row of ornamental projections, *m*, above which is a chain ornament, *n*. The

front of the fire-place is provided with horizontal bars *o*, which are intersected by vertical bars *p*, forming panels, the top of each of the bars *p* being surmounted by an acorn-shaped tip. The top D of the grate is of the form shown, with projecting points *7* near its front corners, and on this top rests the base of an ornamental urn, E, having two handles, *q*, on opposite sides. G is the blower, of the form shown, having two panels, *r r*, one on each side of the handle *s*, a rosette, *t*, being placed between the two panels *r r*, the bottom of the blower being provided with a series of small panels, *8*. The ash-pit door H is provided with an ornamental panel, having a rosette, *v*, at each side, the two upper corners of the door being rounded.

What I claim as my invention, and desire to secure by Letters Patent, is—

1. The design for a portable grate, substantially as herein shown and described.
2. The design of the urn E, as shown and described.
3. The design of the blower G, as shown and described.

Witness my hand this 10th day of January, A. D. 1876.

FRANK A. MAGEE.

In presence of—

P. E. TESCHEMACHER,
W. J. CAMBRIDGE.
