UNITED STATES PATENT OFFICE

GORDON H. NOTT, OF HYDE PARK, MASSACHUSETTS.

DESIGN FOR FURNACE-BRICK.

Specification forming part of Design No. **8,917**, dated February 1, 1876; application filed January 7, 1876.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, GORDON H. NOTT, of Hyde Park, in the county of Norfolk and State of Massachusetts, have invented a new and original Design for Furnace Bricks; and I do hereby declare that the following is a full, clear, and exact description thereof, which will enable others skilled in the art to which it pertains to make and use the same, reference being had to the accompanying drawing, and to the letters of reference marked thereon, which form a part of this specification.

This my new and original design for furnace-bricks is fully shown in the drawings, on which Figure 1 represents a front view, Fig. 2 represents a top view, Fig. 3 represents a side view, and Fig. 4 represents a rear view, of my invention.

The upper end of the brick is formed to a taper, as shown in Fig. 3, and its lower end

is tapered from both sides, as shown in the same figure. The front or face of the brick is curved to the form shown in Fig. 2. The rear of the lower corners is inclined or tapered off, as represented in Fig. 4.

What I wish to secure by Letters Patent, and claim, is—

The new and original design for furnace-bricks, as shown in the accompanying drawings, having a curved front, and tapered in their upper and lower ends, substantially as described.

In testimony that I claim the foregoing as my own invention I have affixed my signature in presence of two witnesses.

GORDON HALL NOTT.
