UNITED STATES PATENT OFFICE.

ROBERT B. ESLER, OF PHILADELPHIA, PENNSYLVANIA.

DESIGN FOR A WATCH-CHARM.

Specification forming part of Design No. 9,005, dated February 15, 1876; application filed September 29, 1875.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, ROBERT B. ESLER, of Philadelphia, Pennsylvania, have invented a Design for Jewelry, &c., of which the following is a specification:

This invention relates to an improved design for a charm.

The nature of my design is fully represented in the accompanying photographic illustration, to which reference is made.

The letter A represents a cube or truncated pyramid, of any suitable size, made either hollow or solid, and has formed at its upper edges a convex bead, B, setting below the straight shoulders *b b*, formed at right angles to each other, for the purpose of finishing the plain edges at the top of the pyramid, and giving it a more pleasing appearance. It is provided with a ring or hook, *a*, by means of which it may be secured to a chain or other article. The four faces or sides of the cube or truncated pyramid are each inscribed with the names of fourteen of fifty-six signers of the Declaration of Independence, and the article

is to be known as the original fifty-six-pound weight.

I am aware that a watch-charm consisting of a representation of the original independence fifty-six-pound weight is not of itself new, such being shown in the design-patent to Alfred Huffnagle, dated February 10, 1874, No. 7,164, which I disclaim.

Having thus described my invention, what I claim, and desire to secure by Letters Patent, is—

The design for a watch-charm composed of a truncated square pyramid having around its edges, at the upper or smaller end, a bead, B, interposed between the straight shoulders *b b* and the sides or faces, substantially as described, and shown in the accompanying illustration.

ROBERT B. ESLER.
