# UNITED STATES PATENT OFFICE.

CHARLES A. PERLEY, OF BALDWINSVILLE, MASSACHUSETTS, ASSIGNOR TO THOMPSON, PERLEY & WAITE, OF SAME PLACE.

## DESIGN FOR CONVERTIBLE CHAIRS.

Specification forming part of Design No. 9,111, dated February 29, 1876; application filed January 10, 1876.  
[Term of Patent 7 years.]

*To all whom it may concern:*

Be it known that I, CHARLES A. PERLEY, of Baldwinsville, in the county of Worcester and State of Massachusetts, have invented a Design for Chair, of which the following is a specification:

The nature of this design is fully represented in the accompanying photographic illustration, to which reference is made.

The seat *a* is composed of a U-shaped frame, *b*, extending about the back and sides of the horizontal seat portion, and the front of the seat is waved, as at *c*. The back *d* is composed of a U-shaped frame, *e*, forming the bottom and sides, and a top piece, *f*. Inside the U-shaped frame the back-piece is formed of different-colored woods, and so also is the horizontal seat *a*. The top piece *f* has a center crown, *g*, mounted on a neck, *h*; and each side the crown and neck are points 1, inclines 2, concaved portions 3, an angled projection, 4, and a curved projection, 5, and below this ir-

regular top is a bead-line, 6. The arms *j* connect the back and seat.

I prefer to veneer a portion of the front of the back with veneer of contrasting colors or woods, and so also the upper portions of the arms *j*.

I claim—

1. The design for a chair-back, consisting of the frame *e* and the top piece *f*, as shown and described.

2. The design for the top piece, consisting of the center crown *g* and portions 1, 2, 3, and 4.

3. The design for a chair, consisting of the top piece *f*, having a crown-piece, *g*, and portions 1 2 3 4, frame *e*, arms *j*; and seat *a c*, as shown and described.

CHARLES A. PERLEY.
