UNITED STATES PATENT OFFICE.

THOMAS B. ATTERBURY, OF PITTSBURG, PENNSYLVANIA, ASSIGNOR TO J.
S. AND T. B. ATTERBURY, OF SAME PLACE.

DESIGN FOR PEDESTAL FOR STEMMED GLASSWARE.

Specification forming part of Design No. 9,114, dated February 29, 1876; application filed December 14, 1875.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, THOMAS B. ATTERBURY, of Pittsburg, county of Allegheny, State of Pennsylvania, have invented or discovered a new and useful Design for Pedestal for Stemmed Glassware; and I do hereby declare the following to be a full, clear, concise, and exact description thereof, reference being had to the accompanying drawing, making a part of this specification, which represents my design in front view.

My improved design in glass pedestals for stemmed articles of glassware consists of a glass base, *a*, of any suitable form, surmounted by a glass figure of a human bust, both in one piece, and the bust being surmounted with suitable means, *b*, for attaching the peg of a superimposed bowl or socket.

The drapery and ornamentation of the bust may be varied or omitted, according to the taste of the maker or user.

It will be observed that the bust retains the natural form or outline of the body at the plane of its union with the base, except as varied by the drapery.

The design gives the best effect when made in white, colored, or opaque glass.

I claim—

The design in glass pedestals of base *a*, attachment *b*, and interposed human bust, the latter retaining its natural form down to the plane of its junction with the base, substantially as set forth.

In testimony whereof I have hereunto set my hand.

THOS. B. ATTERBURY.
