# UNITED STATES PATENT OFFICE.

CHARLES E. L. HOLMES, OF NEW YORK, N. Y., ASSIGNOR TO THE LAWRENCE  
CURRY-COMB COMPANY, OF SAME PLACE.

## DESIGN FOR KNOCKER-PLATES FOR CURRY-COMBS.

Specification forming part of Design No. **9,115**, dated February 29, 1876; application filed January 3, 1876.  
[Term of Patent 7 years.]

*To all whom it may concern:*

Be it known that I, CHARLES E. L. HOLMES, of the city and State of New York, have invented or produced a Design for Knocker-Plates of Curry-Combs, of which the following is a specification:

The shape and configuration of this knocker-plate is shown in the drawings. Both edges are zigzag in reverse, forming alternate wide and narrow portions *a* and *b*, and the rivet-holes are in the wide portions. At one end of the knocker-plate there is a projection, *d*, that is of the general shape shown, and it is the shape and form that results from cutting out

the plates in reverse from one strip of metal, as indicated by dotted lines.

I claim as my invention—

The design of the shape and configuration of the knocker-plates for curry-combs, with the edges zigzag and in reverse, and with a projection, *d*, at one end, as described and shown.

Signed by me this 29th day of December, A. D. 1875.

CHAS. E. L. HOLMES.
