UNITED STATES PATENT OFFICE.

FREDERICK R. SEIDENSTICKER, OF WEST MERIDEN, CONN., ASSIGNOR TO
THE BRADLEY & HUBBARD MANUFACTURING COMPANY, OF SAME
PLACE.

DESIGN FOR LAMP-STANDS.

Specification forming part of Design No. **9,119**, dated February 29, 1876; application filed February 21, 1876
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, FREDERICK R. SEIDENSTICKER, of West Meriden, in the county of New Haven and State of Connecticut, have invented a new Design for Lamp-Stand "B"; and I do hereby declare the following, when taken in connection with the accompanying drawings, to be a full, clear, and exact description of the same, and which said drawings constitute part of this specification, and represent a front view.

This invention relates to a design for lamp-pedestals; and it consists in the peculiar configuration of the pedestal, as shown in the accompanying illustration, and hereinafter described.

The base is square, with its sides inclined inward, and on the sides a tracery of scroll-work. On this base a pillar rests. In this part of the design the pillar is of circular form, the lower portion spherical, and from this a tapered section rises to the fount-socket, a bead intervening between the two sections of the pillar.

The pillar may be used with a different base, or the base with a different pillar, it only being essential to this design for the base that a pillar be present, or to the pillar that a base be present.

I claim—

1. The design for lamp-pedestal, consisting of a square base, the sides of which incline inward, and ornamented by a tracery of scroll-work, as shown in the accompanying illustration, and combined with a pillar resting thereon.

2. The design for lamp-pedestal, consisting of a pillar, the lower section of which is of spherical form and resting upon a base, the upper section of conical form, with an intervening bead, as shown in the accompanying illustration.

FREDERICK R. SEIDENSTICKER.
