UNITED STATES PATENT OFFICE.

THOMAS C. PEARS, OF PITTSBURG, PENNSYLVANIA.

DESIGN FOR GLASSWARE.

Specification forming part of Design No. 9,179, dated April 4, 1876; application filed January 28, 1876.

[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, THOMAS C. PEARS, of Pittsburg, in the county of Allegheny and State of Pennsylvania, have invented a new and useful Design for Glassware; and I do hereby declare the following to be a full, clear, and exact description thereof, reference being had to the accompanying drawing forming a part of this specification, in which—

Figure 1 represents a footed bowl, and Fig. 2 a nappy.

Like letters refer to like parts in each.

My design for hollow glassware, having a foot or foot and stem of glass, consists in giving to the plain bowl portion of the article the form of a flattened sphere or oval, the lip being within the greatest diameters.

A indicates a plain bowl, provided with a foot, B, the bowl A being drawn in above so as to preserve the elliptical form and bring

the lip *a* within the greatest diameters of the bowl. The foot B or stem may be ornamented with facets or flutes, if desired, but the characteristics of the design are dependent on the form of the bowl.

Having thus described my design, I claim as my invention—

The design for hollow glassware, having a foot or foot and stem of glass as herein described, said design being produced by giving to the plain bowl portion of the article the form of a flattened sphere or oval, the lip of the bowl being within the greatest diameters of the figure.

In testimony whereof I, the said THOMAS C. PEARS, have hereunto set my hand.

THOMAS C. PEARS.
