UNITED STATES PATENT OFFICE.

PIETRO CINQUINI, OF MERIDEN, CONNECTICUT, ASSIGNOR TO CHARLES PARKER, OF SAME PLACE.

DESIGN FOR COFFEE-MILL COVERS.

Specification forming part of Design No. 9,189, dated April 4, 1876; application filed March 16, 1876.
[Term of Patent 14 years.]

To whom it may concern:

Be it known that I, PIETRO CINQUINI, of Meriden, in the county of New Haven and State of Connecticut, have invented a new Design for Coffee-Mill Cover; and I do hereby declare the following, when taken in connection with the accompanying drawings, to be a full, clear, and exact description of the same, and which said drawings constitute part of this specification, and represent in—

Figure 1, top view; Fig. 2, transverse section.

This invention relates to a design for the cover of that class of coffee-mills known as "box-mills," and in which the hopper is set flush with the top of the box, the cover constructed in divisions, so as to be turned from over the hopper in a horizontal plane; and the invention consists, first, in the peculiar configuration of the cover; and, second, in the ornamentation of the same.

The cover is of circular form, and in trans-

verse section, as shown in Fig. 2, a flat edge; then a segmental or convex border, with the central portion raised to the spindle-opening, as shown in Fig. 2.

The ornamentation consists of a border of scroll-work, surrounding a center of leaves projecting radially from the spindle-opening, as shown in Fig. 1.

I claim—

1. The design for box-mill cover, consisting of the flat edge, convex border, and raised central portion, as shown in the accompanying illustration.

2. The design for the ornamentation of box-mill cover, consisting of the border of scroll-work, with the center of radial leaves, as shown in the accompanying illustration.

PIETRO CINQUINI.
