# UNITED STATES PATENT OFFICE.

WILLIAM W. ELLIOTT AND GEORGE R. JARMAN, OF BALTIMORE, MD.

## DESIGN FOR A BADGE.

Specification forming part of Design No. 9,240, dated April 25, 1876; application filed March 31, 1876.  
[Term of Patent 3½ years.]

*To all whom it may concern :*

Be it known that we, W. W. ELLIOTT and GEORGE R. JARMAN, of Baltimore, Maryland, have originated a Centennial Design for Badges and similar articles of jewelry, of which the following is a full, clear, and exact description, reference being had to the drawing, making part of this specification.

The nature of our invention is fully represented in the accompanying drawing, to which reference is made.

A is the representation of an eagle with partially-extended wings, as if about to fly, with the head and beak turned toward the left. Held by the center in the beak is a streamer, B, its ends floating free, and having inscribed upon it the words "E Pluribus Unum"—"E Pluribus" to the left and "Unum" to the right of the beak. On the breast of the eagle, and between the wings, is the American shield C. On each side of the design, covering a corner of the shield and extending over the lower part of the adjacent wing, is a representation of a coin, the one on the left bearing centrally a portrait of Washington, with the name "G. Washington" above, and the date "1776" below; the one on the right bearing, in like manner, a portrait of Grant, with the name "U.

S. Grant" above and the date "1876" below. Extending below the shield are seen a portion of the tail and the feet of the eagle, the latter clutching with their talons several arrows, which run horizontally.

The distinctive feature of my invention is the manner in which the representations of the American shield, and the coins bearing the portraits, &c., of Washington and Grant, are combined with the representation of an eagle holding in its beak a streamer inscribed with the words "E Pluribus Unum."

Having thus described my invention, what I claim as new is—

The design for a badge, composed of the representations of the American shield, the coins bearing the portraits of Washington and Grant having name and date, and an eagle holding in its beak a streamer bearing the words "E Pluribus Unum," substantially as described, and shown in the accompanying drawing.

WILLIAM W. ELLIOTT.  
GEORGE R. JARMAN.
