# UNITED STATES PATENT OFFICE.

ISAIAH W. TABER AND THOMAS H. BOYD, OF SAN FRANCISCO, CAL.

## DESIGN FOR A PHOTOGRAPHIC MOUNT.

Specification forming part of Design No. **9,359**, dated June 27, 1876; application filed February 23, 1876.  
[Term of Patent 3½ years.]

*To all whom it may concern:*

Be it known that we, ISAIAH W. TABER and THOMAS H. BOYD, of the city and county of San Francisco, State of California, have originated and designed a Pattern for Cameo-Photographs, of which the following is a full, clear, and exact description, reference being had to the accompanying drawing.

The nature of our invention is to make cameo-photographs circular instead of oval, as heretofore. To do this we emboss, press, or stamp the raised portion of the card upon which the photograph is to be placed, with a die and counter-die which is both circular and convex on its face, so as to produce a circular convex cameo or raised portion upon the card.

Photographic card-pictures thus cameoed we call "spherical" photographs.

What we claim as our invention is—

The design for a photographic mount, having an equilateral rectangular outline and a circular cameo-medallion in the center, substantially as described, and shown in the accompanying drawing.

In witness whereof we hereunto set our hands and seals.

ISAIAH W. TABER. [L. S.]  
T. H. BOYD. [L. S.]
