# UNITED STATES PATENT OFFICE.

SAMUEL KELLETT, OF SAN FRANCISCO, CALIFORNIA.

## DESIGN FOR CENTER-PIECE.

Specification forming part of Design No. 9,440, dated August 15, 1876; application filed July 3, 1876.

[Term of Patent 14 years.]

*To all whom it may concern:*

Be it known that I, SAMUEL KELLETT, of the city and county of San Francisco, State of California, have invented a new and original Design for a Center-Piece, of which the following is a specification:

The invention is illustrated in the accompanying photograph, which represents a face view of design.

The central portion of design is highly ornamental, and consists in a drop of leaves and balls on base of drop. Four leading figures extend from base of drop to bead-molding, the ends of which are scrolled, holding stems that flow out fine scrolls to right and left. Leaf-like shells surmount these figures. Between these described forms are placed shields with large balls in center, surrounded by small balls. A circular panel, composed of ovals on raised base, makes second division of de-

sign. The outer border is composed of two figures. The large figure is heart-shaped, inclosing engraved leaf. The lesser form is a small device, placed on plain ground, which is curled on sides touching larger figure.

The letter A designates drop of center-piece; B, leading figure, with shell surmounting; C, scrolls, flowing out from end of figure; D, shields with balls in center; E, panel surrounding inner forms; F, heart-shaped figure; G, small device.

Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is—

The design for center-piece, as set forth and described.

SAMUEL KELLETT.
