# UNITED STATES PATENT OFFICE.

GEORGE G. MILLER, OF PHILADELPHIA, PENNSYLVANIA.

## DESIGN FOR BRACÉLETS.

Specification forming part of Design No. 9,576, dated October 3, 1876; application filed July 31, 1876.  
[Term of patent 3½ years.]

*To all whom it may concern:*

Be it known that I, GEORGE G. MILLER, of the city and county of Philadelphia and State of Pennsylvania, have originated a Design for Bracelets, of which the following is a full, clear, and exact description, reference being had to the accompanying drawings, making part of this specification, in which—

Figures 1 and 2 are views of opposite faces of the bracelet. Fig. 3 is a central section in line *x x*, Fig. 2. Fig. 4 is a face view of the bracelet extended.

Similar letters of reference indicate corresponding parts in the several figures.

Referring to the drawings, A represents the body of the bracelet, consisting of a plate having longitudinally-extending parallel spaces *a*

*a*, forming bars or strips *A'*, which are separated from each other. By means of divisions B extending transversely or at an angle to the spaces *a*, the bars or strips form series or sections, as *B' B''*, the whole presenting a neat and graceful design.

What I claim as my invention is—

The design for a bracelet, composed of the body A, with longitudinally-extending bars or strips *A'* and spaces *a*, and transversely-extending divisions or cross-bars B, forming the sections *B' B''*, substantially as described, and shown in the drawings.

GEORGE G. MILLER.
