# UNITED STATES PATENT OFFICE.

JAMES WILKINSON, OF MOUNT VERNON, NEW YORK.

## DESIGN FOR BRACELETS.

Specification forming part of Design No. **9,579**, dated October 3, 1876; application filed September 14, 1876.  
[Term of Patent 3½ years.]

*To all whom it may concern :*

Be it known that I, JAMES WILKINSON, of Mount Vernon, in the county of Westchester and State of New York, have originated and Designed a Pattern for Bracelets, of which the following is a full, clear, and exact description, reference being had to the accompanying drawing, making part of this specification.

In said drawing, Figure 1 represents a side view of my bracelet. Fig. 2 is a plan of the same when unrolled.

Similar letters indicate corresponding parts.

This invention relates to the design for an open-work bracelet composed of a series of parallel bars, which are connected by diamond-shaped filling-pieces.

In the drawing, the letter A designates my

bracelet, which consists of a series of parallel bars, *a*, which are connected by diamond-shaped filling-pieces *b*. By this combination a bracelet is obtained which has a new and ornamental appearance.

What I claim as new, and desire to secure by Letters Patent, is—

The design for an open-work bracelet composed of parallel bars *a* and diamond-shaped filling-pieces *b*, as shown and described.

In testimony that I claim the foregoing I have hereunto set my hand and seal this 12th day of September, 1876.

JAMES WILKINSON.
