By Atty. *John S. Earle* Inventor.

UNITED STATES PATENT OFFICE.

HENRY W. HIRSCHFELD, OF WEST MERIDEN, CONNECTICUT, ASSIGNOR TO
THE MERIDEN BRITANNIA COMPANY, OF SAME PLACE.

DESIGN FOR SPOONS.

Specification forming part of Design No. 9,591, dated October 17, 1876; application filed August 21, 1876.
[Term of Patent 14 years.]

To all whom it may concern:

Be it known that I, HENRY W. HIRSCHFELD, of West Meriden, in the county of New Haven and State of Connecticut, have invented a new Design for Spoon; and I do hereby declare the following, when taken in connection with the accompanying drawings and the letters of reference marked thereon, to be a full, clear, and exact description of the same, and which said drawings constitute part of this specification, and represent a front view.

This invention relates to a design for the handle of spoons and forks, and like articles of table service; and it consists in the peculiar configuration, as more fully hereinafter described.

In representing this design the handle is shown as applied to a spoon, but it will be understood that it is equally applicable to forks and like articles.

Starting from the bowl or body, the handle

extends to a boss, *a*, and from there gradually expands in a curved line, terminating in a segmental form, with a tip in the center, giving to the end the appearance of a crown.

The upper end of the handle is ornamented to clearly define the segment of a circle, and give to that end the appearance of a crown, as shown in the accompanying illustration.

I claim—

The herein-described design for spoon and fork handles, consisting in the outwardly-curved sides, terminating in a segment of circle form, with a central tip, the said segment of a circle being clearly defined in ornamentation, and representing a crown, all as shown in the accompanying illustration.

HENRY W. HIRSCHFELD.
