# UNITED STATES PATENT OFFICE.

FRANK A. MAGEE, OF CHELSEA, ASSIGNOR TO THE MAGEE FURNACE COMPANY, OF BOSTON, MASSACHUSETTS.

## DESIGN FOR PARLOR COOKING-STOVES.

Specification forming part of Design No. 9,602, dated October 24, 1876; application filed September 26, 1876.  
[Term of Patent 7 years.]

*To all whom it may concern:*

Be it known that I, FRANK A. MAGEE, of Chelsea, in the county of Suffolk and State of Massachusetts, have invented and produced a new and original Design for a Parlor Cooking-Stove, of which the following is a full, clear, and exact description, reference being had to the accompanying engraving, making part of this specification.

In the engraving A represents the base of the stove, which is supported upon ornamental legs *b*, and is provided with a straight hearth and curved sides, an ornamental Grecian border, *c*, extending around it near the edge. B is the lower portion of the stove, which contains the oven and ash-pit, the door C of the latter having an oval panel, *d*, with a Grecian border, outside of which, at the corners of the door, are small Grecian ornaments *e*. The oven is provided on each side of the stove with a curved door, D, having an oval panel, *f*, embellished with a Grecian border, and containing a central device or figure, *g*, in bass-relief. Outside the panel *f* are Grecian corner ornaments *h*. The portion *i*, in which is placed the draft-slide, curves outward and downward to the top of the ash-pit door. The upper portion E of the stove, which contains the fire-pot, is of the same general form as the body B, and is provided in front with an or-

namental door, *k*, having mica panels and a Grecian border. Above the door *k* is a small narrow door, *l*. At one side of the portion E is a curved door, G, provided with an oval Grecian bordered panel, *m*, and corner ornaments *n*, and at the opposite side of the portion E is a panel of similar design, which forms an imitation door. Each of the four corners of the stove are ornamented with fluted columns *p q*. The top H of the stove is of the form shown, being embellished with ornamental open-work, and is surmounted by an urn, I, made in the form of an inverted frustum of a cone, and provided with straight ornamental handles *r*. The front and rear of this urn are each ornamented with a panel, *s*, containing a figure in bass-relief.

What I claim as my invention, and desire to secure by Letters Patent, is—

The design for a parlor cooking-stove, composed essentially of the base A, portions B E, and top H, with their panels and ornaments, substantially as herein shown and described.

Witness my hand this 22d day of September, A. D. 1876.

FRANK A. MAGEE.

In presence of—

P. E. TESCHEMACHER,  
N. W. STEARNS.
