UNITED STATES PATENT OFFICE

JAMES WILKINSON, OF MOUNT VERNON, NEW YORK.

DESIGN FOR A BREASTPIN.

Specification forming part of Design No. 9,609, dated October 31, 1876; application filed October 4, 1876.
[Term of Patent $3\frac{1}{4}$ years.]

To all whom it may concern:

Be it known that I, JAMES WILKINSON, of Mount Vernon, county of Westchester, and State of New York, have originated and designed a Design for Breastpin, of which the following is a full, clear, and exact description, reference being had to the accompanying drawing, making part of this specification.

In the drawing, Figure 1 represents a face view of my design. Fig. 2 is a longitudinal section thereof.

Similar letters indicate corresponding parts.

My design consists of an oblong escutcheon serrated at its two opposite ends, and containing a series of parallel bars, whereby I obtain a design presenting a neat and distinguished appearance.

In the drawing, the letter A designates an oblong escutcheon, which is ornamented at its

two opposite ends with serrations or notches *b*, and in which are formed a series of three (more or less) bars, *c*, parallel to each other. The said escutcheon A is bent or curved longitudinally, as seen in Fig. 2.

What I claim as new, and desire to secure by Letters Patent, is—

A design for breastpin, consisting of the oblong escutcheon A serrated at its two opposite ends, and containing a series of parallel bars, *c*, substantially as shown and described.

In testimony that I claim the foregoing I have hereunto set my hand this 27th day of September, A. D. 1876.

JAMES WILKINSON.
