UNITED STATES PATENT OFFICE.

HENRY CARLISLE, JR., OF PHILADELPHIA, PENNSYLVANIA.

DESIGN FOR BRACELETS.

Specification forming part of Design No. 9,616, dated November 14, 1876; application filed October 5, 1876.

[Term of Patent 3½ years.]

To all whom it may concern:

Be it known that I, HENRY CARLISLE, Jr., of the city and county of Philadelphia, and State of Pennsylvania, have originated and designed a new and useful Improvement in Bracelets, of which the following is a full, clear, and exact description, reference being had to the accompanying drawing, making part of this specification.

Figure 1 is a face view of the bracelet. Fig. 2 is a view of the same, spread to show

the entire configuration.

A represents a series of diagonally-extending parallel strips, with intervening spaces B. A' A' represent circumscribing side strips, and C the end pieces, the whole configura-

tion presenting a light and graceful appearance, of which the diagonally-extending separated strips A are prominent.

The band may be made of hard rubber,

horn, metal, or other suitable material.
What I claim as my invention is—

The design for a bracelet composed of a series of separated strips, A, extending diagonally, the circumscribing side strips A', and end pieces C, substantially as above described, and shown in the accompanying drawings.

HENRY CARLISLE, JR.
