UNITED STATES PATENT OFFICE.

WILLIAM N. WEEDEN, OF WATERBURY, CONN., ASSIGNOR TO BENEDICT & BURNHAM MANUFACTURING COMPANY, OF SAME PLACE.

DESIGN FOR DRAWER-PULLS.

Specification forming part of Design No. **9,663**, dated December 5, 1876; application filed November 22, 1876.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, WILLIAM N. WEEDEN, of Waterbury, in the county of New Haven and State of Connecticut, have invented a new Design for Drawer-Pull; and I do hereby declare the following, when taken in connection with the accompanying drawings, to be a full, clear, and exact description of the same, and which said drawings constitute part of this specification, and represent a front view.

This invention relates to a design for that class of drawer-pulls commonly known as "shell-pulls"—that is to say, pulls which are attached to the front of the drawer, so as to leave a cavity on the side between the pull and the drawer, in which the fingers may be inserted; and it consists in the peculiar configuration of the pull, as shown in the accompanying illustration.

The body of the pull is of triangular form, the sides concave, and tipped with a trefoil or clover-leaf shape, to form ears by which to secure the pull. The two sides are ornamented by a ring resting upon the base, and meeting in the center, as shown in the accompanying illustration.

I claim—

The design for drawer-pull, consisting of the triangular-shaped shell, tipped at its angles with a trefoil ear, and combined with a ring-shaped ornament on each of the two sides, as shown and described.

WM. N. WEEDEN.
