UNITED STATES PATENT OFFICE.

WILLIAM N. WEEDEN, OF WATERBURY, CONN., ASSIGNOR TO BENEDICT & BURNHAM MANUFACTURING COMPANY, OF SAME PLACE.

DESIGN FOR DRAWER-PULLS.

Specification forming part of Design No. 9,664, dated December 5, 1876; application filed November 22, 1876.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, WILLIAM N. WEEDEN, of Waterbury, in the county of New Haven and State of Connecticut, have invented a new Design for Drawer-Pull; and I do hereby declare the following, when taken in connection with the accompanying drawings, to be a full, clear, and exact description of the same, and which said drawings constitute part of this specification, and represent a front view.

This invention relates to a design for drawer-pulls of that class which are of shell shape, and attached to the drawer so as to leave a cavity between the pull and the drawer for the insertion of the fingers; and it consists in the peculiar configuration, as shown in the accompanying illustration and hereinafter described.

The body of the pull consists of a segmental-shaped base, with a vertical center-piece resting on the said base, with a supporting-brace at each side, the three principal points tipped with an ornamental shape to form ears for securing the pull, and the braces with a center ornament, as shown in the accompanying illustration.

I claim—

The design for drawer-pull consisting of the segmental base, vertical center, the three points tipped, and with the side braces, as shown in the accompanying illustration and herein described.

WM. N. WEEDEN.
