UNITED STATES PATENT OFFICE.

HENRY A. WOOD, OF BANGOR, MAINE.

DESIGN FOR A STOVE.

Specification forming part of Design No. **9,671**, dated December 12, 1876; application filed November 16, 1876.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, HENRY A. WOOD, of Bangor, in the county of Penobscot and State of Maine, have invented a new and original Design for a Stove; and I hereby declare that the following is a full, clear, and exact description thereof, reference being had to the accompanying photographic illustration, in which the nature of my invention is fully shown.

My stove is designed for heating purposes, and its general form is rectangular, the corners being ornamented with molded columns, as at *a*. The top projects beyond the body of the stove, and is ornamented with the moldings shown in the photograph, and provided with an urn, *b*. The front door is attached to a projecting panel, *c*, which is continued to the hearth *d* of the stove, the space between

the door and the hearth being ornamented with fluted work *e*. The hearth projects in front of the stove, having a foot-rail, *f*, across its front edge.

The various moldings, panels, and other ornamental work are fully shown in the photograph, and will be readily understood by an examination of it.

What I claim as my invention, and desire to secure by Letters Patent, is—

The design for a stove, as herein set forth, and shown in the photographic illustration.

In testimony whereof I have hereunto set my hand this 6th day of November, A. D. 1876.

HENRY A. WOOD.
