UNITED STATES PATENT OFFICE.

WILLIAM HELLER, OF NEW YORK, N. Y.

DESIGN FOR TRAVELING BAGS AND SATCHELS.

Specification forming part of Design No. **9,687**, dated January 2, 1877; application filed December 2, 1876.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, WILLIAM HELLER, of the city, county, and State of New York, have originated a new Design for Satchel, of which the following is a full, clear, and exact description, reference being had to the accompanying drawing, in which—

Figure 1 is a face view. Fig. 2 is a section in the plane *x x*, Fig. 1.

Similar letters indicate corresponding parts.

This design consists of embossed strings of pearls *a* between the rectilinear ribs or beads *b c*, which extend across the face of the satchel *A* in a horizontal direction. Beneath these rectilinear ribs is a curved bead, *d*, above a flat depression, *e*, and above said curved bead is an embossed string of pearls, *f*. Beneath the curved ornament are the pockets *B* for the closing-straps *C*. These pockets are ornamented on their sides by rectilinear beads *g g*, with an intervening embossed string of pearls, *h*, and the bottom edges of said pockets are embellished by embossed roof-shaped ornaments *i*. The outer ends of the closing straps are ornamented by embossed arabesques *j*.

What I claim as new, and desire to secure by Letters Patent, is—

1. The design for a satchel, composed of rectilinear beads *b c*, in combination with embossed strings of pearls *a*, situated between the beads *b c*, as shown and described.

2. The combination of an embossed string of pearls, *f*, with the curved lines *d e*, as shown and described.

3. The design of the embossed roof-shaped ornaments *i* for the strap pockets, as shown and described.

4. The design of the embossed arabesques *j* on the closing-straps *C*, as shown and described.

In testimony that I claim the foregoing I have hereunto set my hand and seal this 28th day of November, 1876.

WM. HELLER. [L. s.]
