UNITED STATES PATENT OFFICE.

PETER KINTZ, OF WEST MERIDEN, CONNECTICUT, ASSIGNOR TO BRADLEY & HUBBARD MANUFACTURING COMPANY, OF SAME PLACE.

DESIGN FOR LAMP-HOLDERS.

Specification forming part of Design No. 9,724, dated January 30, 1877; application filed December 20, 1876.
[Term of Patent 3½ years.]

To all whom it may concern:

Be it known that I, PETER KINTZ, of West Meriden, in the county of New Haven and State of Connecticut, have invented a new Design for Lamp-Holder; and I do hereby declare the following, when taken in connection with the accompanying drawings, to be a full, clear, and exact description of the same, and which said drawings constitute part of this specification, and represent, in—

Figure 1, a view from the under side, and in Fig. 2 a side view, showing the outline.

This invention relates to a design for the basket or holder, which is attached to a fixture, to receive and support a lamp-fount; and it consists in the peculiar configuration and ornamentation of the holder, as shown in the accompanying illustration.

The outline of the holder is seen in Fig. 2 in vertical section. The lower portion is of the cyma-reversa or ogee form, the upper por-

tion of a cyma-recta or reverse ogee, with a concave band between. The lower portion forms a center, *a*, within the concave band *b*, and ornamented with a star-shaped figure, as seen in Fig. 1, the upper portion *c* having the appearance of a succession of shields, *d*, resting on the band *b*, as shown in the drawings, the said upper and lower portions being substantially ogee form in vertical section.

I claim—

The design for lamp-holder, consisting of the two sections *a c*, with a band between, the lower section *a* representing a star-shaped ornament as a center, the upper section *c* a crown, as shown in the accompanying illustration and herein described.

PETER KINTZ.
