UNITED STATES PATENT OFFICE

JOSEPH W. FISKE, OF NEW YORK, N. Y.

DESIGN FOR COMBINED WATER-FONT AND CONTRIBUTION-BOX.

Specification forming part of Design No. **9,757**, dated February 20, 1877; application filed February 10, 1877.

[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, **JOSEPH W. FISKE**, of New York, in the county of New York and State of New York, have invented a Design for Combined Water-Font and Contribution-Box, of which the following is a specification:

The nature of my design is fully represented in the accompanying photograph, to which reference is hereby made.

The design consists of a column having an ornamental base and capital supporting a water-basin, A, the sides of which are fluted vertically, and which has an outwardly-curved rim, as shown in the illustration.

Upon a central stem or post within the basin is mounted a contribution-box, B, which is octagonal in form, and the sides of which are curved outward as they ascend, and are each provided with an ornament somewhat

resembling an inverted clover-leaf. The top of the box B is made in canopy form—that is, it rises from the sides in a curve, and terminates at the center, where it is surmounted by an ornamental cross, as clearly shown in the accompanying photograph.

It is obvious that the details of the ornamentation of the box may be slightly varied without departing from the general design or appearance.

What I claim as my invention is—

The herein-described design for a combined water-font and contribution-box, the same consisting of the basin A and box B, as shown in the accompanying photograph.

JOSEPH W. FISKE.
