UNITED STATES PATENT OFFICE

WILLIAM TWEEDDALE, OF BROOKLYN, NEW YORK, ASSIGNOR TO THE
NORTH AMERICAN IRON WORKS, OF SAME PLACE.

DESIGN FOR VASE.

Specification forming part of Design No. **9,769**, dated February 27, 1877; application filed November 29, 1876.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, WILLIAM TWEEDDALE, of Brooklyn, Kings county, and State of New York, have invented a new and original Design for a Vase, of which the following is a full, clear, and exact description, reference being had to the accompanying photographic illustration, making part of this specification.

A represents the top of the flange of the bowl, which is ornamented with the raised figures *b*, with surrounding plain-surfaced and oval-pointed sections *c*, between which are the points *d*. The upper portion of the outside of the bowl of the vase is ornamented with the vertical projecting oval ribs *e*, surrounded by the plain raised bands *f*, with the pendent pointed ribs *g* between said bands. The lower portion of the exterior of the vase is ornamented with the raised leaf-shaped figures *h* and the raised figures *i*. The top of the pedestal is ornamented with the raised centers *j*, raised surrounding rings or bands *k*, the intermediate raised ribs *l*, and the scroll-figures *m* and *n*. The body of the standard expands in concavo-conical form each way from the middle or thereabout to its junctions with the base and the bowl, respectively, has vertical flutes or grooves *o*, with plain intervening spaces *p*, and near the middle has the ornamental boss *q*, with the raised ornamental figures *r* on its sides. The base is ornamented with the raised figures *t* on the oval or convex section, between the upper plain ring *u* and the lower convex ring *w*, and with the beaded ring *x* on the margin below the ring *w*.

The handles consist of the scroll B and the pendant D, which have scroll-ornaments *a'*, *b'*, and *c'*, center star-shaped figure *d'*, boss *e'*, and the figures *f'* and *g'*.

What I claim as my invention is—

1. In a design for a vase, the upper portion of the outside of the bowl, ornamented with the vertical projecting oval ribs *e*, surrounded by the plain raised bands *f*, and the pendent pointed ribs *g*, between said bands, substantially as described and shown.

2. The lower portion of the exterior of the bowl, ornamented with the raised leaf-shaped figures *h* and the raised figures *i*, as described and shown.

3. The top of the pedestal, ornamented with the raised centers *j*, the surrounding rings or bands *k*, intermediate raised ribs *l*, and the scroll-figures *m* and *n*, as described and shown.

4. The base, ornamented with the raised figures *t* on the oval or convex section, below the upper plain ring *u* and the lower convex ring *w*, and with the beaded ring *x* on the margin below the ring *w*, as described and shown.

5. The handles, ornamented with the screw B, pendants D, scroll-figures *a'*, *b'*, and *c'*, center star-shaped figures *d'*, boss *e'*, and the figures *f'* and *g'*, as described and shown.

WILLIAM TWEEDDALE.
