UNITED STATES PATENT OFFICE.

JAMES FENTON, OF BIRMINGHAM, ENGLAND, ASSIGNOR TO JOHN THORNTON & CO., OF NEW YORK CITY, N. Y.

DESIGN FOR CARD OF BUTTONS.

Specification forming part of Design No. **9,905**, dated April 17, 1877; application filed March 22, 1877.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, JAMES FENTON, of Birmingham, in the county of Warwick, England, have invented a Design for a Card of Buttons, of which the following is a specification:

I produce a long-drawn and peculiar distinctive effect, analogous to triple railroad-tracks, by arranging long and narrow parallelograms of metal-foil, or analogous material, in line with each other, forming three lines.

The accompanying drawing forms a part of this specification, and correctly represents the forms and arrangement.

The parallelograms are marked A at one

end, and B at the other end, of each. The body of the card is marked C, and may be variously decorated. The buttons are set on the tin-foil.

I claim—

The design for a card of buttons, substantially as described, and as illustrated in and by the accompanying drawing.

In testimony whereof I have hereunto set my hand this 27th day of February, 1877, in the presence of two subscribing witnesses.

JAMES FENTON.
