HERMANN J. MÜLLER, OF NEW YORK, N. Y.

## DESIGN FOR CLOCK-CASE.

Specification forming part of Design No. **9,969**, dated May 8, 1877; application filed April 27, 1877.  
[Term of Patent 7 years.]

*To all whom it may concern:*

Be it known that I, HERMANN J. MÜLLER, of the city, county, and State of New York, have invented a new and original Design for a Clock-Case, of which the following is a specification:

The nature of my design is fully represented in the accompanying photographic illustration, to which reference is made.

A represents the lower part or base of the case, the forward side of which is inclined upward, and has palms or other ornamental designs formed upon it. From the top of the case A there is an inward and upward curve, B, to the projecting portion C, the outer ends of which are beveled to a point, and upon which are formed representations of various Eastern objects. Upon the top of the portion C rests the lower ends of the columns D, upon which are formed in relief palm-leaves E, which project upon the outer sides of said columns. From the upper parts of the columns D other palm-leaves, F, project inward, pass beneath the side bars of the door-frame, and extend beneath the dial-plate. The columns D are made with ornamental beads, upon which rests the top of the case. In the center of the top of the case is the figure of an Egyptian head, G, wearing an ornamental head-dress, from which the ends of an orna-

mental scarf hang upon the sides of the head, and extend down to the ornamented collar placed around the neck of the head. Upon each side of the head G is a palm-leaf, H. Upon the ends and base of the top are formed various ornamental angular projections and recesses.

I claim as my invention—

1. A design for a clock-case in which the sides are formed of columns D, having palm-leaves E formed upon them in relief, and projecting upon the outer sides of said columns, and from the upper part of which palm-leaves F project inward beneath the side bars of the door-frame and below the dial-plate, substantially as herein shown and described.

2. A design for a clock-case in which the top has, in its center, the figure of an Egyptian head, G, wearing an ornamental head-dress, from which the ends of an ornamental scarf hang upon each side down to the ornamental collar placed around the neck of said head, and at the sides of which head are seen palm-leaves H, substantially as herein shown and described.

HERMANN J. MÜLLER.
