# UNITED STATES PATENT OFFICE.

GEORGE W. MEADER, OF WOONSOCKET, RHODE ISLAND.

## DESIGN FOR SHOES.

Specification forming part of Design No. 10,001, dated May 22, 1877; application filed April 23, 1877.  
[Term of Patent 7 years.]

*To all whom it may concern:*

Be it known that I, GEORGE W. MEADER, of Woonsocket, in the county of Providence and State of Rhode Island, have invented a new and valuable Improvement in Designs for Shoes; and I do hereby declare that the following is a full, clear, and exact description of the construction and operation of the same, reference being had to the annexed drawings, making a part of this specification, and to the letters and figures of reference marked thereon.

Figure 1 of the drawings is a representation of a side view of my design for shoes.

The nature of my design is fully illustrated in the accompanying photograph; and it consists in a design for gaiter-boots having buttons and a buckle, as hereinafter more fully set forth.

A represents a gaiter-boot, and B the flap thereof. C C are buttons fastened to the boot, and D is a buckle, also fastened to the gaiter at the ankle.

The flap B is made of the particular configuration shown—that is to say, its edge is formed with a series of convex or rounded projections, *a*, in which are made the button-holes, and a series of concave depressions, *b*, between the rounded projections, and above the upper projection *a* the flap is extended to form the strap G, which goes in the buckle D.

What I claim as new, and desire to secure by Letters Patent, is—

The design for gaiters shown and described, consisting of a gaiter, A, having two or more buttons, C, and buckle D, with the flap B, having curved projections *a*, concave depressions *b*, and strap G, as set forth.

In testimony that I claim the above I have hereunto subscribed my name in the presence of two witnesses.

GEORGE W. MEADER.

Witnesses:
